SUMMARY

Recent IT graduate and motivated Full Stack Developer with hands-on internship experience building end-to-end web applications. Proficient in modern web technologies including React, .NET, and Express.js. Proven ability to design robust databases, integrate RESTful APIs, and streamline HR business processes. Eager to leverage a strong technical foundation and adaptability to deliver impactful solutions in a full-time developer role.

WORK EXPERIENCES

Full Stack Developer Intern TQM | Jan 2026 – Apr 2026

- Developed a full-stack Candidate Pool management system utilizing VS Code, React, and .NET to replace manual Excel-based tracking, streamlining the HR hiring workflow.
- Architected database schemas with Microsoft SQL Server and efficiently managed data queries and database administration using DBeaver.
- Implemented the frontend architecture for a digital intern Timesheet system using React, integrating with Express.js APIs—rigorously tested via Postman—and a PostgreSQL database for seamless data synchronization.
- Maintained efficient version control and collaborative workflows across all projects by utilizing GitLab and SourceTree.

PERSONAL PROJECTS

Online Hiring Automation System | Aug 2025

- Engineered automated workflows using Make.com to integrate online forms directly into Google Sheets and trigger real-time email alerts, significantly reducing manual tracking workloads for HR.

Movie Ticket Booking Website | Jan 2025 – May 2025

- Built a web application for booking movie tickets using Python (Django), HTML, CSS, and JavaScript, featuring a dynamic seat selection and real-time price calculation system.

Image Guessing Mobile Game | Jan 2024 – May 2024

- Created an interactive mobile game using Thunkable, successfully implementing core game mechanics including scoring algorithms, a health (hearts) system, and an engaging user interface.

EDUCATION

Sripatum University | 2023 - 2026

Bachelor of Science in Information and Communication Technology

GPA: 3.54

TECHNICAL SKILLS

- Frontend: React, HTML, CSS, JavaScript
- Backend: .NET, Express.js (Node.js)
- Databases: Microsoft SQL Server, PostgreSQL
- Tools & Version Control: VS Code, GitLab, SourceTree, Git, Postman, DBeaver, Figma
- Automation & Low-Code: Make.com, Thunkable

SOFT SKILLS

- Cross-functional Teamwork
- Problem-Solving
- Effective Communication
- Adaptability & Fast Learner
